## 2 Significant Milestone of S\$337.0m Non-Core Portfolio Divestment Reducing Gearing While Awaiting Investment Opportunities Amidst Asset Repricing

- Divestments are in-line with our 4R strategy
- Properties divested are Non-Core assets
- Evaluation criteria are in place to analyse divestments
- Double whammy: (1) Rate of value decline increases for short land leases (2) expected rise in cap and discount rates impacting asset valuations
- Price discovery process by CBRE<sup>(1)</sup>
- Gearing reduced to 33.6%<sup>(2)</sup>
- Coupled with unencumbered portfolio will provide significant debt headroom to:
  - ✓ Optimise capital structure
  - ✓ Recycle capital towards rejuvenating portfolio to higher quality New Economy assets

### Key Considerations of Proposed Portfolio Divestment

#### Non-Core Assets Characteristics:

- 1) have short underlying land lease,
- 2) are small in size,
- 3) have limited AEI/ redevelopment potential or
- 4) have dated property specs

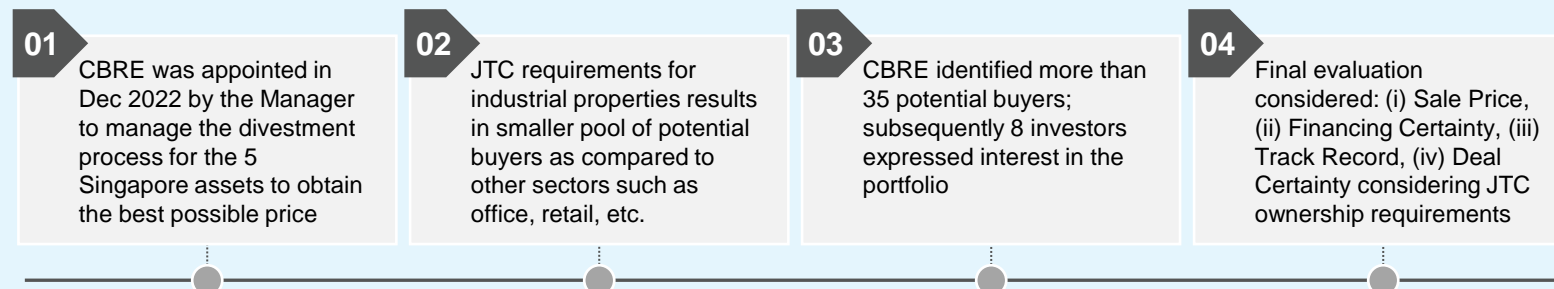

#### 1) Properties with short land leases will experience accelerated rate of decline in value

- Portfolio of 5 SG assets have average remaining land lease of c.25 years
- Had the Manager attempted to divest assets individually, the time taken to source for and negotiate with individual buyers (restricted by JTC constraints) may be protracted; as such the aggregate selling price may not be higher than the Portfolio Sale Consideration

#### 2) Rising interest rates are putting pressure on asset valuation

- Since start 2023, interest rates have risen by >100 bps, and is expected to increase capitalisation rates and discount rates, negative impacting property valuations
- It is difficult to predict when interest rates will stabilise or decrease, creating a potential double whammy on property valuations while land lease decay continues amidst higher interest rates

### Price Discovery Process Conducted by CBRE

Since 2021, E-LOG has divested c.S\$611.4 million of non-core assets at both discount and premium to valuation depending on property type, building specifications and buyer profile achieving an average of 1.6%<sup>(3)</sup> premium to valuation and within regulatory thresholds

# 4 E-LOG is Backed by a Strong and Committed Sponsor, ESR Group

Since becoming E-LOG's Sponsor in 2017, ESR Group has backstopped 100% of all preferential offerings by E-LOG...

- ✓ E-LOG is sponsored by ESR Group Limited, **APAC's number one real asset manager** and the **third largest listed real estate investment manager globally<sup>(1)</sup>** with **c.US\$150bn** in gross assets under management
- ✓ Backstop of preferential offering showcases the Sponsor's **continual effort** in supporting the REIT and **reinforcing their commitment** to the REIT's growth trajectory over the long haul
- ✓ ESR Group's substantial stake of **c.15.8%** in the REIT provides for **alignment of interest**
- ✓ E-LOG continues to **enjoy access** to ESR Group's New Economy pipeline, and leverages its capabilities and network to expand into countries where ESR Group has an established presence

### Key Acquisition Criteria:

- ✓ High Quality New Economy Assets
- ✓ Scalable Markets and in Developed Countries
- ✓ Leverage ESR Group's real estate platform and local expertise

# Market Outlook

## Key Summary and Takeaways

- 1 Continued rises in interest rate coupled with tepid growth is expected to impact economic growth in 2H2023
- 2 Expected increase in capitalisation & discount rates and the strength of the SGD are expected to negatively impact asset valuations
- 3 Key risks in 2H2023 will be the continued rising interest rates' impact on gearing, NAV and DPU
- 4 Mitigating factors are E-LOG's (a) expected low gearing (b) minimal loan refinancing requirements till 2025 (c) well-spread out debt expiry profile (d) high fixed interest rates and (e) continued favorable demand/supply dynamics of Logistics segment in Singapore and Australia

## Outlook remains cautious against backdrop of high interest rates...

### Macro Environment

- IMF forecasts for global growth to decelerate from 3.4% in 2022 to 2.8% in 2023<sup>(1)</sup>. The high interest rate environment and continued supply chain disruptions continue to weigh down on the recovery of the global macro economies and real estate transactions.
- Continual interest rate hikes are expected despite easing inflation as inflation coupled with underlying price pressures are proving sticky with labor markets tight in many economies.
- Tepid demand growth from China reopening has impacted global demand.
- Depth and pace of economic structural trends like increased inventory onshore, leading to higher warehouse demand, are expected to continue as tailwinds for E-LOG for the rest of 2023
  - E.g., Ensuring food security and MNCs move towards improving supply chain resilience by expanding logistics capabilities as part of "Just-In-Case" manufacturing process is expected to drive demand for E-LOG's logistics properties

# Market Outlook

## Singapore

- Forecasted growth for Singapore's economy is expected to slow to 0.5% - 2.5% y-o-y in 2023, down from 3.6% y-o-y in 2022.
- New Economy sectors such as Logistics and High-Spec Industrial sectors should continue to outperform despite the moderation in demand, with forecasted rent growth of 3.1% and 7.5% respectively in 2023 amidst tight pre-committed supply conditions and resilient long-term demand expected from the e-commerce, life science and technology sectors<sup>(1)</sup>.
  - In the short-term, given global manufacturing weakness and below expectations growth from China's reopening, High-Specs segment is likely to face slower space demand as the tenants in advance manufacturing sectors are the majority space users.
- Overall, we expect positive rental reversions and occupancy growth in E-LOG's portfolio to be more cautious in 2H2023 albeit still in the positive territory. Logistics segment is still expected to perform.

## Australia

- The Australian economy is expected to moderate with GDP growth forecasted to ease from 3.6% to 1.5% in FY2023 and FY2024<sup>(2)</sup>.
- Interest rates is expected to continue to trend higher as the Reserve Bank of Australia (RBA) attempts to bring inflation under control with a 4-percentage point increase to a cash rate of 4.10% since May 2022<sup>(3)</sup>.
- The total new supply for 2023 is expected reach a record high of 3.1 million sqm, with the increase in supply in 1Q2023 mainly led by Brisbane and Sydney.
  - It is however still unlikely to be sufficient to restore equilibrium between supply and demand in the near term as supply is unable to catch up with the overwhelming demand.
- The continued rental strength is expected to mitigate the expected increases in cap rates, discount rates and strength of the SGD which are key risks to asset valuation

## Japan

- Despite the slowdown in the global economy, the Japan economy is recovering with the support from economic activity normalization, increase in wages, and accommodative fiscal and monetary policies<sup>(4)</sup>.
- GDP is expected to expand with a pick up in domestic spending and capital investments, but the CPI rate of increase is expected to decelerate from 2022 toward the middle of 2023 due to waning effects of increase in import prices being passed on to consumers and an improving output gap.
- Forecasted rents are expected to be flattish moving into 2023 and 2024 for most of Greater Tokyo, apart from Tokyo Bay Area due to lack of supply and its location being closest to Tokyo City.

# 4R Strategy

## Reinforce Sponsor Commitment

- ✓ S\$150m Fully Backstopped Preferential Offering launched in March 2023
- ✓ Visible and Executable Asset Pipeline from Sponsor

- GFA: 252,700 sqm
- >90% Occupancy
- Multi-tenanted
- >40yrs Land Tenure

- Greater Tokyo & Osaka
- 4 Stabilised Assets
- 100% Occupancy
- Freehold Land Tenure

## Recycle Capital

- ✓ Proposed non-core divestments of S\$337.0m (short remaining land lease)

## Recapitalise For Growth

- ✓ Gearing reduced to 33.6%<sup>(1)</sup>
- ✓ Increased debt headroom allows for growth opportunities

## Rejuvenate Asset Portfolio

- ✓ 3 AEs with yield on cost of 6.0% - 7.1%
- ✓ c.S\$240.0m redevelopment of cold storage facility

# Conclusion

1

## Strong Positive Portfolio Rental Reversions and Resilient Operational Performance

- Portfolio rental reversion at +11.6% in 1H2023, led by New Economy sectors comprising c.63.2% of portfolio
- Resilient operational performance with high occupancy of 92.9% as at 30 June 2023 underpinned by stable demand and limited supply of quality spaces
- Well-staggered lease expiry profile, with strong rental collections at 98.5% of total receivables

2

## Prudent Capital Management

- Gearing at 39.4% (reducing to 33.6%<sup>(1)</sup> upon repayment of debt with divestment proceeds), with 74.8% of borrowings on fixed interest rates
- All FY2023 expiring debt has been refinanced – no refinancing risk for remaining of FY2023
- Weighted average all-in cost of debt maintained consistently at 3.96% p.a.

3

## Portfolio Rejuvenation and Capital Recycling

- Announced AEs and redevelopments are on track
- Proposed divestments of seven non-core assets aggregating S\$337.0 million; proceeds to repay debt in the interim
- Divestment proceeds provide significant debt headroom and financial strength to capitalize on investment recycling opportunities amidst asset repricing

4

## Market Outlook Remains Cautious Against Backdrop of High Interest Rates

- Continued rises in interest rate coupled with tepid growth is expected to impact economic growth in 2H2023
- Expected increase in capitalisation & discount rates and the strength of the SGD are expected to negatively impact asset valuations
- Key risks in 2H2023 will be the continued rising interest rates' impact on gearing, NAV and DPU
- Mitigating factors: Post repayment of loans from divestment proceeds (a) Low gearing ratio (b) high fixed interest rates (c) <10% of loans up for refinancing each year till 2025 (d) well-spread out debt expiry profile and (e) the continued favorable demand/supply dynamics of the Logistics segment in Singapore and Australia

# Singapore Industrial Market Outlook

**Overall occupancy rate for industrial property market fell to 88.8% as new completions remaining strong in 1Q2023, and new supply continues to exceed new demand**

- Price and rental index of industrial space in 1Q2023 have continued to rise amidst inflationary pressures. Price and rental increased by 1.5% and 2.8% respectively as compared to the previous quarter, and 6.9% and 8.8% respectively compared to the preceding year<sup>(1)</sup>.
- Singapore's economic growth is expected to slow to about 0.5% to 2.5% y-o-y in 2023, from 3.6% y-o-y in 2022. Despite the weaker economic outlook, industrial rental growth is expected to hold up this year, led by a resilient demand from 3PL players. The industrial factory sector is expected to see moderated growth of up to 1.0% in 2023 resulting from manufacturing slow down, lackluster export performance and higher supply<sup>(2)</sup>.
- Due to rising macroeconomic headwinds, occupiers continues to be cautious towards expansion needs. In the Business Park sector, selected tech and R&D industries have also given up over 75% shadow space. Coupled with the expected completion of Elementum in 2023, the rents in Business Parks are expected to be muted for rest of 2023<sup>(3)</sup>.
- Demand for the Warehouse sector is expected to remain resilient, driven by strong competition for storage space in modern ramp-up developments<sup>(2)</sup> and no new completions for the rest of the year.
- New economy sectors such as the Logistics and High-Spec Industrial sectors should continue to outperform despite the moderation in demand, with rents rising by 3.1% and 7.5% respectively q-o-q as well as forecasted rent growth to be in high single digit positive range for FY2023.

# Australia Industrial Market Outlook

While the supply for 2023F is forecasted to be at a record high of approx. 3.1 million sqm, the overwhelming demand for logistics space is expected to continue to outstrip the supply capacity

- 1 The Australian economy is expected to moderate with GDP growth forecasted to ease from 3.7% to 1.25% in FY2023 and FY2024<sup>(1)</sup>.
- 2 Higher interest rates coupled with higher inflation and tighter monetary policy settings are expected to dampen the growth in Australian economy.
- 3 The strength of the Australian industrial and logistics sector has continued into Q2 2023 with over 930,000sqm leased, albeit the take up in 1H2023 has fallen by approx. 37.0% comparing the same period in 2022<sup>(2)</sup>. Take up is expected to continue to slow down for rest of 2023 as consumers reign in their budget and spending on discretionary retail items in view of recessionary fears.
- 4 2023 is a record year for development completions, totaling 3.1 million sqm of floorspace, with approx. 690,000 sqm of space delivered nationally<sup>(3)</sup>. It is however still unlikely to be sufficient to restore equilibrium between supply and demand in the near term as pre-commitment-rate of the supply for the year is high in 80% range.
- 5 Rental uplift is expected to continue in 2023 in high single digit growth. Incentives remain low up to 7.5% range.

# Japan Logistics Market Outlook

Significant new supply for 2023 and 2024 is major factor behind rising vacancy rate, loosening supply-demand balance.

- 1 Due to the booming logistics and supply chain demand during COVID-19, a large supply of new logistics facilities became available in the Greater Tokyo market in 2022 and completion will continue in 2023. Demand on the other hand is outpaced by the influx and absorption of the new supply. Vacancy rates remains as a continuing concern<sup>(1)</sup>.
- 2 New Large Multi-Tenant (LMT) logistics facility supply for Greater Tokyo rose by an unprecedented 324,000 tsubo in 1Q2023, above the record 260,000 Tsubo. The increased supply has led to a 2.5% vacancy rate in Greater Tokyo, the first time surpassing 2% since 1Q2019.
- 3 Although robust demand for logistics facilities is displayed by logistics operators and e-commerce businesses, the new supply still outstrips net absorption and exert impact on vacancy rate of existing properties. Tenants now enjoy an abundance of options in the new market and yet are cautious with expansion in the midst of economic uncertainty.
- 4 Logistics operators are facing higher operating costs due to labour shortages and high energy prices. This has resulted in landlords having challenges in increasing rents since tenants are operating on thin margins.
- 5 Forecasted rents are expected to be flattish moving into 2023 and 2024 for most of Greater Tokyo, apart from Tokyo Bay Area due to lack of supply and its location being closest to Tokyo City.

**ESR Group or the Sponsor:** ESR Group Limited

## Definitions:

- **AUM:** refers to the total value of investment properties (excluding right of use of leasehold land), investments in joint venture and property funds
- **Effective Gross Rents:** effective rents take into account rent-free periods and rental escalation as the total rent payable for the lease period would be less than what is reported for passing rents
- **Gross Rents:** contracted rent
- **New Economy:** refers to logistics and high-specs industrial sectors
- **Portfolio Occupancy:** excludes properties under development
- **Passing Rents:** rent payable as stipulated in the lease agreement. These rates are usually quoted on gross basis
- **Rental Reversion:** a metric captured by some REITs to show whether new leases signed have higher or lower rental rates than before. Based on average gross rent
- **Weighted Average Lease Expiry:** a metric used to measure the tenancy risk of a particular property. It is typically measured across all tenants' remaining lease in years and is weighted with either the tenants' occupied area or the tenants' income against the total combined area or income of the other tenants
